***Reasons For Allowance***

1. Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1-20 are allowable because none of the prior art discloses a method/a testing device for testing an electronic component in which a predetermined load is set, the method/testing device comprising: supplying constant current to flow through the electronic component so that a predetermined temperature of the electronic component is controlled to be increased to a burn-in temperature; comparing the voltage actually applied to the electronic component to a burn-in voltage, correcting a burn-in time-period based on the comparison to determine a corrected burn-in-time-period, and applying constant current to flow through the electronic component based on the corrected burn-in-time-period, and in the combination as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kawaguchi et al. (U. S. Patent No. 6, 476, 617) discloses a sorting method of monolithic ceramic capacitors, the method including first performing a burn-in process, which applies a voltage at a temperature to the ceramic capacitor and measuring an insulation resistance.
